Sensor sheet
Cal-stops table
CTD cal casts
Drift fit
CvHG16 dense segments
Raw logger files
RBR Solo SBE56
L0
Clock calibration (per sensor)
L1
Cut to deployment window + in-situ CTD calibration
Gridded L1
Interpolate onto common depth–time grid
L2
Subtract drift (per sensor)
Gridded L2
Drift-corrected temperature product
Configuration (per mooring)
data paths · sensor & mooring layout · segments · gridding · calibration · drift parameters
